

Invasive Aquatic Species Committee
Chair Jerry Levine

I have been in contact with Ed Rudberg, CEO of CD3 General Benefit Corporation. They manufacture a waterless self-service boat cleaning equipment for launch sites. It is currently being used at various sites across the U.S. to prevent the spread of invasive aquatic species from one body of water to another. I have received information on the equipment and waiting for locations of the equipment within the NE region.

I will make a brief presentation at our Monday meeting, on the attributes and merits of the system.

Jerry
