

Newsletter and Program report 4/19/20

I think we should plan to put out a newsletter in the near future., even if it is an abbreviated one.

Don has written a President's letter, and I will write an article with tips on planting for birds and pollinators , especially using native plants.

Lee's education report was excellent and I'm hoping he can elaborate a little more on some of his suggestions in an article.

It would be great if Jerry had time to write an article on recognizing one of the invasive plants found in our watershed and how it can be removed.

Ramona, do you want to write anything about the herring count or herring crawl?

Martha said she would write something about the birds returning to the watershed now.

Anyone else who thinks of something that should be included please let me know.

I have no information on when we can reschedule programs yet.
