

Invasive Aquatic Species Committee

Chairman Jerry Levine

The invasive aquatic species committee will be doing our annual sampling with Sara Grady the end of August or beginning of September. The committee's previous sampling indicate that we do not have significant aquatic plant issues in our two ponds.

As requested by Don, I have contacted Bill Wood who lives on Elbow Pond. He has indicated an interest to be on our Water Quality Committee and Invasive Aquatic Species Committee. I have invited him to participate in our sampling for both of our committees. As a resident of Elbow Pond, he is concerned with the issue of the new residential construction on the Pond. I believe he will be an asset in the base line sampling of Elbow Pond. We should encourage him to establish an Elbow Pond residence committee, that will be concerned with pond issues.
